

HOW TO PREPARE A BIKE FOR DONATION

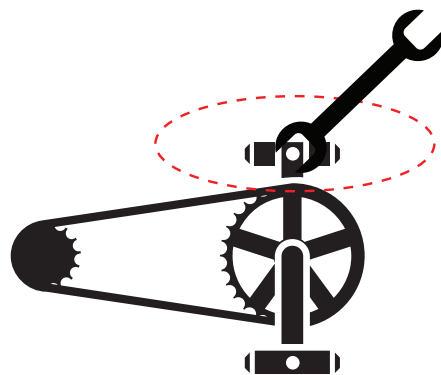

Simply by following these quick steps we can get more bikes checked in and into the hands of the people who need them most.

STEP 1

Give it a bath with soapy water to remove any dirt or spider webs

STEP 2

Remove the peddles and attach to the frame using a cable tie or string

STEP 3

Turn the handlebars sideways and give the tyres a pump so we can see if they require new tubes.

If you are not able to do any of these steps, not to worry we run regular workshops so you can come along and get some of our volunteers to assist. If your bike is not in working order please consider your local steel recycler or waste management centre so it can be turned into something new.
